**MIDWIFE'S FINAL SCIENTIFIC WORK, JANUARY 2023  
A CONTINUITY OF MIDWIFERY CARE MANAGEMENT IN MRS. A AT TPMB N  
KEBUN JERUK IN 2022**

**CASE SUMMARY**

Midwives provide midwifery care on an ongoing basis starting from the process of pregnancy, childbirth, postpartum, newborn and postpartum family planning services as an effort to accelerate the reduction of MMR and IMR in Indonesia. Comprehensive midwifery care for Mrs "A" at PMB N Kebon Jeruk District, West Jakarta was carried out with midwifery care management and documented using the SOAP method. The objective is to find out the benefits of implementing continuous midwifery care management for Mrs. A at TPMB N Kebon Jeruk in 2022. The methodology uses continuous midwifery care management involving a pregnant woman starting from the third trimester, delivery assistance, postpartum and breastfeeding as well as family planning services and newborn care by applying medical herbs and complementary therapies. Mrs. A 22 years old with G2P1A0 first contact at 36 weeks of gestation. The results of this comprehensive midwifery care in ANC pregnancies were 10 times, given service with 10 T. Delivery occurred normally, no complications occurred and puerperium went normally and postpartum visits were made 4 times, no puerperal complications were found, given blood supplement tablets for 40 days puerperium, the mother only gave breast milk to her baby. At the 4th postnatal visit the patient used the 3 month injection method. Newborns were normal and given normal newborn care, neonatal visits were carried out 3 times, babies were only given breast milk, there were no problems with breastfeeding, hepatitis B0 immunization was given at the first visit. Complementary midwifery care for mothers during pregnancy is Gymball and hypnoparenting. During childbirth, birth ball care is given, relaxation techniques to deal with labor pain. During the postpartum period complementary care is given by giving lactation and oxytocin massages as well as hypnobreastfeeding, while babies are given baby massage care. The process of pregnancy, childbirth, childbirth, neonates in Mrs. A runs according to the normal process, was given services according to government programs. Family planning services and complementary midwifery care are carried out so that complications or problems do not occur in the mother or baby. Continuing midwifery management care benefits women and families. It is expected that caregivers will carry out complementary care as an effort to prevent complications in mothers and babies.

**Keywords:** continuous midwifery care management, pelvic rocking technique, gym ball, oxytocin massage, byai massage.
