

CHAPTER V

CONCLUSION AND SUGGESTION

After the researcher has analyzed and interpreted the data supplied in the previous chapter, this chapter delivers the research's conclusion and recommendations for further research. The conclusion is covered by the study problem statement however the proposal is meant to provide information to future researchers who may be interested in carrying out related research.

5.1 Conclusion

The researcher concluded the type of anger based on the mackle mouse theory and the reasons for the type based on personal study and multiple findings from all the data reviewed, based on the findings and talks in the preceding chapter. The researcher found 35 data that had been classified in each type; however, two types could not be classified in the type based on the researcher's theory. The data that had been found was from the mid90s film. This includes the use of angry expressions taken from each dialogue and classifying the reasons for each data.

In the meantime, the researcher also discovered the causes of the manifestation of anger from each data set, categorizing it into eleven types. Of all the data sets discovered, verbal anger was the most prevalent type of anger data in the mid90s movie. and discovered that Warning and Disagreeing were the main causes of the expression of anger

5.2 Suggestion

In the analysis of this study, the researcher did not find twelve types of anger in the movie “mid90s” but the researcher found eleven types of reasons for each data of anger expression. The researcher advises that to increase the variety of their findings, future researchers should look for angry faces or include several various factors. This study's flaw is that the researcher exclusively applies the Mackle Mouse theory, which leaves out any theoretical analysis of the research problem. As a result, the analysis findings are similarly constrained. It is advised that future researchers attempt to use many theories to cover more comprehensive and difficult analytical results, especially those who are interested in the same topic
