Abstract

AN IMPLEMENTATION OF NURSING CARE MANAGEMENT WITH THE PROFESSIONAL NURSING PRACTICE MODEL (MPKP) METHOD IN THE BOUGENVILLE ROOM RSU UKI JAKARTA

Wanti Novianti, Millya Hellen

Background: Professional nursing practice model (MPKP) is a system (structure, process and professional values) that allows professional nurses to manage the provision of nursing care including the environment, which can support the provision of such care.

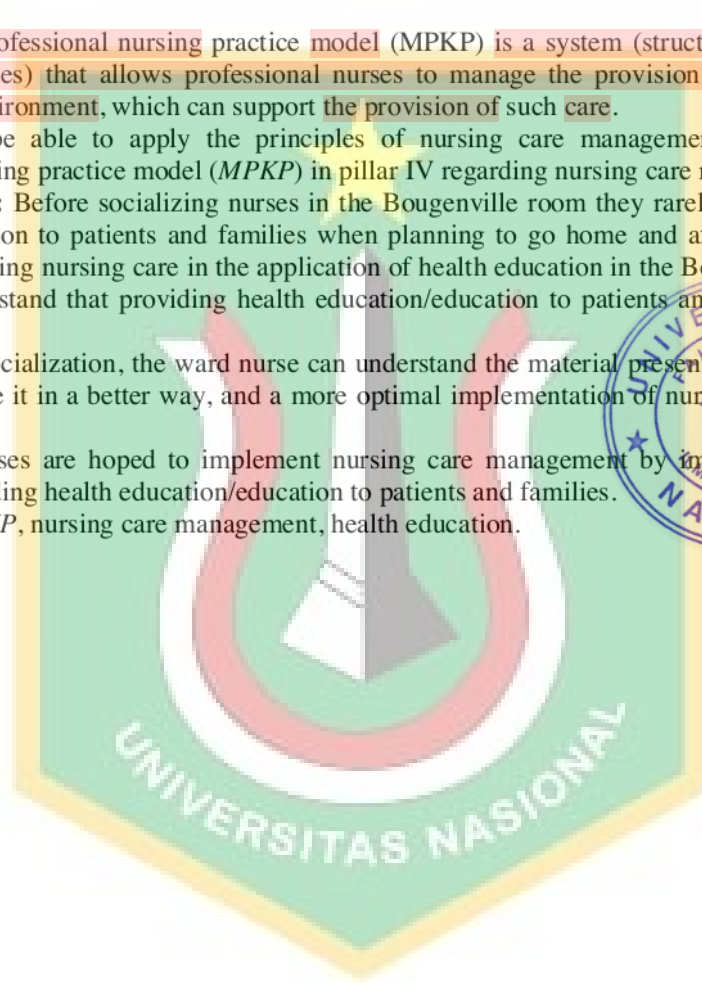

Objective: To be able to apply the principles of nursing care management by using the professional nursing practice model (MPKP) in pillar IV regarding nursing care management.

Implementation: Before socializing nurses in the Bougenville room they rarely provide health education/education to patients and families when planning to go home and after socialization regarding improving nursing care in the application of health education in the Bougenville room, nurses can understand that providing health education/education to patients and family is very important.

Results: After socialization, the ward nurse can understand the material presented and the ward nurse will change it in a better way, and a more optimal implementation of nursing care will be implemented.

Suggestion: Nurses are hoped to implement nursing care management by improving nursing services in providing health education/education to patients and families.

Keywords: MPKP, nursing care management, health education.
