TAG NUMBER	23VG1401
SERVICE	LEVEL DIAGRAM (mm)
SIZE (DUTY)	150 (D) x 300 (T)
OPERATING	Pressure (kg/cm ²) 4.3
	Temperature (°C) 50
DESIGN	Pressure (kg/cm ²) 5.0
	Temperature (°C) 400
CAPACITY	MMSCFD 250
VESSEL CODE	SS1555318 (DUAL GRADE)

NOTES:

1. USE THE LEVEL TRANSDUCER TO MONITOR THE LEVEL IN THE EXTRACTOR.
2. PROVIDE A RELIEF VALVE TO PREVENT OVERPRESSURE OF DOWNSTREAM SYSTEM.
3. ALL LINES DRAINING TO THE EXTRACTOR SHALL BE TOP ENTRY.
4. HIGH POINT VENT AND LOW POINT DRAINS ARE NOT SHOWN IN DRAWS. THE SAME WILL BE PROVIDED IN PIPING ISOMETRICS.
5. INSULATING CASINGS SHALL BE PROVIDED TO BE CONNECTED WITH FLANGE.
6. HEAT TRACING IS PROVIDED TO MAINTAIN THE TEMPERATURE OF 80°C FOR STAINLESS STEEL PIPING WITH SELF REGULATING CABLE.
7. ALL LEVEL INSTRUMENT DRAINS SHALL BE INSTALLED TO CLOSED DRAIN HEADER.
8. ALL VALVES SHALL BE ACCESSIBLE.
9. SAMPLE CONNECTION SHALL BE INSTALLED IN VERTICAL LINE WITH UPWARD FLOW.
10. REMAIN IN PLACE.
11. LINES RUNNING AFT TO FORE-157.
12. REMOVABLE SPOOL PIECE FOR MAINTENANCE PURPOSE.
13. LINES TO BE CHEMICALLY CLEANED.
14. OPERATING PRESSURE FOR THE WHOLE PROCESS SHALL HAVE A MINIMUM OF 0.20 barg.

HOLDS:

1. PIPE ORifice SIZE AND ITS ASSOCIATED INLET AND OUTLET LINE SIZE.
2. DETAILS.
3. SP FLARE HEADER SIZE.
4. RESTRICTOR ORifice SIZE.

Client:	BW ENERGY DUSAIFU B.V.

Unused gland entries shall be fitted with Ex certified stopping plugs that maintain the Ex certification and IP rating of the equipment.

The heat tracing cables, along with all accessories shall be provided with a valid IECEx Certificate in accordance with IEC 60079 Ref. /20/, from an independent Ex Certification Body approved by the IECEx scheme. Certification shall be in English.

9.3 Heat Tracing Cable

Heat tracing cables shall be of the self-regulating type, designed and constructed in accordance with the relevant IEC standards.

Heat tracing cables shall consist of copper conductors and self-regulating conductive heating element, surrounded with fluoropolymer insulation. Tinned copper braid shall be provided over the electrical insulation with a minimum 80% coverage. A continuous, chemical resistant, fluoropolymer outer jacket shall be provided over the braid.

Heat tracing cables shall have a flat profile, to allow efficient heat transfer and flexibility for spiralling over the pipes, flanges, valves and instruments. SUPPLIER shall indicate the minimum bending radii of the various heat tracing cables on the heat tracing isometric drawings.

Heat tracing cables shall have a burnout proof feature. Overlapping of heat tracing cables is not permitted. Heat tracing cables shall be installed spirally around the pipes as required.

Heat tracing cables shall be held in position with fibreglass tape. The SUPPLIER shall ensure that the fibreglass tape is suitable for the specific piping material.

Heat tracing cables trace out shall have a minimum 10% margin from heat loss calculation to ensure that the cables is suitable for the temperature design.

9.4 Heat Tracing Accessories

The SUPPLIER shall provide all heat tracing materials, including:

- Junction boxes;
- Thermostats;
- Splices;
- Tee joints;
- End seal;
- Power connectors;
- Mounting brackets;
- Pipe straps;
- Fibreglass tape;
- Warning labels;
- Cable glands.

End seals shall be of the type fitted with a light which protrudes above the piping insulation to give an indication that the circuit is energised. The lights shall be long life LED type and green in colour.

9.5 Thermostats

Thermostat controls for protection against over temperature and burnout shall be provided for each heat tracing circuit as required.

Thermostats shall have an adjustable set point.

Calibration certificates shall be provided for each thermostat.
