CHAPTER V

CONCLUSION AND SUGESTION

5.1 Conclusion

In this chapter, the writer wants to conclude the results of the analysis done in the previous chapter. The analysis results include the types of positive politeness strategies used by the characters in Straight Outta Compton, then explain the context and conversational factors in Straight Outta Compton. Based on data analysis, there are 9 types of positive politeness strategies used by the characters. There are 14 character figures in the data found in the film Straight Outta Compton. Named Characters; Andre, Cube, Eazy, Snoop Dogg, Verna, DOC, Yella, Tyree, Bryan, Jerry, Ren, Suge Knight, Jimmy, Carra. The author has found 21 positive politeness data in the film Straight Outta Compton. From the 21 data that have been found, there are 9 types of positive politeness strategies, namely, strategy 1 notice, attend to hearer (Interest, wants, needs, goods) (1 case), strategy 2 exaggerate (interest, approval, sympathy) (6 cases), Strategy 3 intensify interest to hearer (2 cases), strategy 6 avoid dissagrement (3 cases), strategy 8 joke (1 case), strategy 9 assert or presuppose S's knowledge of and concern for H's wants (1 case), strategy 10 offer, promise (5 cases), strategy 12 include both S and H in the activity (1 case), strategy 15 give gifts to H (goods, sympathy, understanding, cooperation) (1 case).

All greetings show the politeness strategies described by Brown and

Levinson. The author explains the context and finds out what factors the characters use when using politeness strategies. These factors are social distance and circumstances. When the speaker and hearer have a close relationship they will use positive politeness strategies.

5.2   Sugestion

I hope readers can use this research as a reference to increase their understanding of the use of language in communicating with others. Positive politeness strategies are essential to ensure good communication and maintain a positive relationship between the speaker and the message recipient. This study discusses positive politeness strategies so readers can learn how to deal with positive responses from message recipients. Other researchers may realize that this study has several weaknesses. The focus is limited to positive politeness strategies. For linguistics students, this study provides essential information about politeness strategies in interactions between individuals who have close relationships and circumstances. However, the speaker needs to understand the factors that influence the selection of politeness strategies. A more in-depth analysis of the factors and functions of implementing politeness strategies is highly recommended so that an understanding of politeness strategies can be more complete and precise.
