

## CHAPTER V

### CONCLUSIONS AND SUGGESTIONS

#### 5.1 Conclusions

Based on the conclusions obtained from data analysis in this research. Judy had fulfilled the Hierarchy's needs. This film was directed by Byron Howard and Rich Moore, produced by Walt Disney, and released in 2016. The main character of this film is Judy Hoops, played by Ginnifer Goodwin. This film tells the story of how someone has a dream and how someone achieves that dream, as Judy plays.

The psychological aspects of a character greatly influence a person's character when facing problems. In human life, there are five hierarchical needs: physiological needs, security needs, love and existence needs, self-esteem needs, and self-actualization needs. A person must fulfill basic needs to achieve self-actualization.

In this research, the researcher discovered Judy's process in fulfilling her 5 Hierarchy of Needs, and the researcher also found Judy's very never-give-up nature, so Judy succeeded in achieving self-actualization.

#### 5.2 Suggestions

Researchers hope that the five Hierarchical needs of humans will always be met, even though many things must be overcome, and the problems are pretty complex for every human being. Hopefully, this research will be helpful in the

community, to know the 5 basic needs that they need to fulfill, and for the community to know what their needs are so that they can achieve their self- actualization, as a high point of achievement in their lives. The researcher also suggests that, for further research, there should be researchers who look for Nick's Hierarchy needs. Whether Nick's Hierarchy needs are met or not.

This research is still far from perfect, but the researcher hopes that there will be further researchers who will advance research with this theory and thus advance literary analysis.
